

ODP-0-572  
1 May 1980

MEMORANDUM FOR: Deputy Director for Administration

FROM: Bruce T. Johnson  
Director of Data Processing

SUBJECT: ODP Report for Week Ending  
30 April 1980

Computer Systems Performance

The performance, workload, and availability for GIMS services (GIMPROD, GIMDEV and CAMPROD) and Ruffing Center batch service were within the desired ranges for the week of 21 - 27 April 1980. Availability percentages were exceptionally high for all of these services during the reporting week. JES3 (batch service), GIMPROD (GIM Production Data Base System) and GIMDEV (GIM Developmental Data Base System) all had 100% availability. [REDACTED]

STATINTL

NPIC Batch Terminals Approved

ODP concurred in a request from NPIC for six Hetra remote batch terminals (RBT's) costing \$173,000. These RBT's are part of NPIC's planned upgrade from the Univac 494 to the Univac 1100/44 and 1100/81. [REDACTED]

STATINTL

IBM 360/67

ODP is declaring the IBM 360/67 computer currently used for TADS as excess to its needs. ODP has informed Directorate ADP Control Officers of the availability of this equipment. ODP is replacing the 360/67 with an IBM 370/158 as the final step in a plan to replace 360 generation equipment with improved 370 generation equipment. [REDACTED]
